

Profile

Tecconsult has provided product development services for over 15 years. We are an independent company supporting technical and scientific innovation to the Therapeutic, Veterinary and Personal Care industries. To date, we have developed over 700 products.

H.P.L.C.

G.C.

U.V.

Product Formulation

- Dosage form design and evaluation.
- We will work with you in ensuring that the dosage form is appropriate.
- Conceptual formulas for feasibility studies.
- Starting formulas are prepared competitively.
- Comparative evaluation.
- We can run comparative analysis of your competitors products and identify opportunities for improvement

Method Development

- Instrumentation includes H.P.L.C., G.C. and UV Spectrophotometer. Method development and validation is our speciality.
- Our experience in these areas may allow us to solve your problem for you.
- Stability indicating methods are developed for most projects.
- Raw materials and finished products

Method Validation

- Full validation to ICH or equivalent Guidelines.
- Partial validations.
- Ruggedness Evaluation.

Stability

- Comprehensive stability programme on all dosage forms.
- Physical, Chemical & Microbiological testing.
- Stability Protocols are designed to regulatory agency requirements.
- Walk in stability ovens which are constantly monitored by temperature probes and tag recorders.

Product Concepts

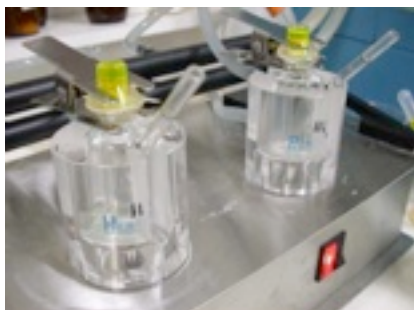

Dissolution Testing

- Solid dosage and suspensions
- USP Methods 1 and 2
- Sustained released measurements
- BCS System testing for Types 1,2,3 and 4 compounds.

Franz Cell Testing

- Comparative testing for optimisation of product vehicle.
- Analysis of time point samples by HPLC,GC or UV.

Pilot Batching

We can prepare pilot batches up to 10 L/ kg of solid blends, emulsion formulations or liquids

Technical Support

Technical Support

- Support for Quality Assurance and Control function.
- We have a vast experience in GMP compliance, specification writing and documentation formatting.
